Journal of Markets & Morality
Vol. 1, no. 1 (Spring 1998)–
Vol. 15, no. 2 (Fall 2012)

Introduction

Journal of Markets and Morality
Vol. 1, no. 1 (Spring 1998)–
Vol. 15, no. 2 (Fall 2012)

To commemorate the fifteenth year and thirtieth issue of the *Journal of Markets & Morality*, the following index was conceived as a way to take a step back to survey what has been built upon a rather humble foundation. From its beginnings as a forum for scholarship and controversy on the morality of the marketplace, the *Journal of Markets & Morality* has grown to include symposiums on a variety of theological and social topics as well as translations of seminal works of early modern economics and law in our *Scholia* section and of important engagements between religion and society in the last two centuries in our *Status Quaestionis* section. We have had theme issues on a range of subjects from urban planning to economic personalism to modern Christian social thought. We entered the information age with online content and recently launched a new website with a searchable database of our archives, among other features. Taking back the scaffolding of years of work and surveying the edifice hidden beneath has revealed an achievement that simultaneously humbles and evokes a sense of pride, but not a single wall of this building could have been built apart from the research, scholarship, and labor of our many contributors.

This index, then, is especially a tribute to all those without whom the *Journal of Markets & Morality* could not be what it is today. From those who contributed only once to those who have come back again and again to grace our pages, the body of work here recorded represents an impressive collection of scholarship on faith, freedom, economics, society, and law from a wide variety of perspectives and professions. Due to their contributions, the *Journal of Markets & Morality* has been a unique place where theologians, lawyers, social scientists, historians,

and political theorists can freely participate in the marketplace of ideas. Much like the credits at the close of a film, this index seeks to honor the work of all these who have integrally contributed to the grandeur of the whole.

Regarding the technical side, this contributors index is a sort of hybrid tool, falling somewhere between a standard index and a bibliography. Entries are organized first by contributor last names, then the journal section in which their contributions appeared, and finally alphabetically by title, issue, and page number. This organization is one that, despite its broad functionality, the search feature of our new website cannot offer to our readership. It enables readers to clearly see the entirety of any contributor's work as well as highlighting the work of those who only contributed once or twice and whose contribution may, perhaps, be otherwise overlooked or forgotten.

Unfortunately, even this format has its limits. In particular, the names of translators are not listed as separate entries because they are not the actual authors of the works they have endeavored to translate. Their work has been, nevertheless, crucial to the level of academic achievement that the *Journal of Markets & Morality* continually strives to meet, and it deserves our utmost appreciation as well.

—Dylan Pahman, Assistant Editor
